Introduction

This Error Catalogue documents validation and business errors derived from the FRD and the underlying BRD.

Each error traces to a functional requirement and, through it, to a business requirement. Exact error codes and messages are treated as unresolved because the source material leaves them open (OQ-012).

Audience: Architecture and Development teams, Quality Assurance and Testing teams, Defect Root Cause Analysis teams, Human reviewers and approvers of functional requirements

Errors

ERR-001 — Onboarding cannot be completed

Description: A customer is unable to complete the onboarding journey.

Related Functional Requirement: FR-001

Source Business Requirement: BR-001

Severity: UNSPECIFIED

Condition: Onboarding cannot be completed or accepted by the system.

Expected Behavior: The system shall surface a relevant error to the customer.

Notes: Exact error codes/messages are unresolved (see OQ-012); exact onboarding workflow and validation rules are unresolved (see OQ-005).

ERR-002 — KYC information cannot be accepted

Description: KYC information provided by a customer cannot be accepted.

Related Functional Requirement: FR-002

Source Business Requirement: BR-002

Severity: UNSPECIFIED

Condition: KYC information cannot be accepted or recorded.

Expected Behavior: The system shall surface a relevant error to the customer.

Notes: Exact validation constraints and error text are unresolved (see OQ-012, OQ-013).

ERR-003 — Aadhaar/PAN information fails format validation

Description: Aadhaar/PAN information provided by a customer does not conform to the expected format.

Related Functional Requirement: FR-003

Source Business Requirement: BR-003

Severity: UNSPECIFIED

Condition: Aadhaar/PAN information fails format-only, mocked validation.

Expected Behavior: The system shall surface a relevant error to the customer.

Notes: Format is format-only and mocked (CON-003). Exact format rules and error text are unresolved (see OQ-012, OQ-013).

ERR-004 — Account activation cannot be performed

Description: A customer account cannot be activated.

Related Functional Requirement: FR-004

Source Business Requirement: BR-004

Severity: UNSPECIFIED

Condition: Account activation fails or is not permitted.

Expected Behavior: The system shall surface a relevant error to the requesting user.

Notes: Exact account-state rules and error text are unresolved (see OQ-006, OQ-012).

ERR-005 — Customer login fails

Description: A customer cannot log in.

Related Functional Requirement: FR-005

Source Business Requirement: BR-005

Severity: UNSPECIFIED

Condition: Customer login fails, including invalid credentials or unauthorized access.

Expected Behavior: The system shall surface a relevant error to the customer.

Notes: Exact authentication and authorization rules and error text are unresolved (see OQ-009, OQ-010, OQ-012).

ERR-006 — Transfer of simulated money cannot be completed

Description: A customer cannot complete a transfer of simulated money.

Related Functional Requirement: FR-007

Source Business Requirement: BR-007

Severity: UNSPECIFIED

Condition: A simulated transfer cannot be completed (for example, blocked by account state or unresolved limits).

Expected Behavior: The system shall surface a relevant error to the customer.

Notes: Exact transfer/payment rules and limits are unresolved (see OQ-007, OQ-012). Minimum balance and daily caps are open (see OQ-002, OQ-003).

ERR-007 — Receipt of simulated money cannot be recorded

Description: Incoming simulated money cannot be recorded for a customer.

Related Functional Requirement: FR-008

Source Business Requirement: BR-008

Severity: UNSPECIFIED

Condition: A simulated receipt cannot be recorded.

Expected Behavior: The system shall surface a relevant error.

Notes: Exact transfer/payment rules and error text are unresolved (see OQ-007, OQ-012).

ERR-008 — Statement cannot be presented or downloaded

Description: A customer cannot view or download a statement.

Related Functional Requirement: FR-009

Source Business Requirement: BR-009

Severity: UNSPECIFIED

Condition: A statement cannot be presented or downloaded.

Expected Behavior: The system shall surface a relevant error to the customer.

Notes: Statement content/download behaviour is unresolved (see OQ-008); error text is unresolved (see OQ-012). Relates to FR-010 for download behaviour.

ERR-009 — KYC review or status update fails

Description: Bank operations cannot review KYC or set KYC status.

Related Functional Requirement: FR-012

Source Business Requirement: BR-012

Severity: UNSPECIFIED

Condition: KYC review fails or a KYC status update cannot be recorded.

Expected Behavior: The system shall surface a relevant error to bank operations.

Notes: See also FR-011 for KYC review. Exact status values and error text are unresolved (see OQ-012, OQ-013).

ERR-010 — Account activation or freeze fails

Description: Bank operations cannot activate or freeze a customer account.

Related Functional Requirement: FR-013

Source Business Requirement: BR-013

Severity: UNSPECIFIED

Condition: An account activation or freeze cannot be performed.

Expected Behavior: The system shall surface a relevant error to bank operations.

Notes: See also FR-014 for account freeze. Exact account-state rules and error text are unresolved (see OQ-006, OQ-012).

ERR-011 — Customer account state cannot be viewed

Description: Bank operations cannot view a customer account's state.

Related Functional Requirement: FR-015

Source Business Requirement: BR-015

Severity: UNSPECIFIED

Condition: Account state cannot be presented to bank operations.

Expected Behavior: The system shall surface a relevant error to bank operations.

Notes: Exact error text is unresolved (see OQ-012).

ERR-012 — Audit trail access fails

Description: Bank operations cannot access the audit trail.

Related Functional Requirement: FR-016

Source Business Requirement: BR-016

Severity: UNSPECIFIED

Condition: The audit trail cannot be accessed or returned.

Expected Behavior: The system shall surface a relevant error to bank operations.

Notes: Exact audit events are unresolved (see OQ-011); error text is unresolved (see OQ-012).

ERR-013 — Bank-operations login fails

Description: Bank operations cannot log in.

Related Functional Requirement: FR-017

Source Business Requirement: BR-017

Severity: UNSPECIFIED

Condition: Bank-operations login fails, including invalid credentials or unauthorized access.

Expected Behavior: The system shall surface a relevant error to bank operations.

Notes: Exact authentication and authorization rules and error text are unresolved (see OQ-009, OQ-010, OQ-012).

ERR-014 — Action not permitted by role

Description: A user attempts an action that is not permitted for their role.

Related Functional Requirement: FR-019

Source Business Requirement: BR-019

Severity: UNSPECIFIED

Condition: A user requests an action inconsistent with their role's permissions.

Expected Behavior: The system shall deny the action and surface a relevant error.

Notes: Exact role permissions and authorization rules are unresolved (see OQ-009); error text is unresolved (see OQ-012).

ERR-015 — State change cannot be recorded for audit

Description: A state change cannot be recorded as an auditable event.

Related Functional Requirement: FR-020

Source Business Requirement: BR-020

Severity: UNSPECIFIED

Condition: An auditable state change cannot be recorded.

Expected Behavior: The system shall surface a relevant error and preserve auditable state-change behaviour.

Notes: Exact audit events are unresolved (see OQ-011); error text is unresolved (see OQ-012).

ERR-016 — Logout cannot be completed

Description: A customer or bank-operations user cannot log out.

Related Functional Requirement: FR-006

Source Business Requirement: BR-006

Severity: UNSPECIFIED

Condition: Session termination cannot be completed for a customer or bank-operations user.

Expected Behavior: The system shall surface a relevant error.

Notes: Applies to FR-006 (customer) and FR-018 (bank operations). Exact error text is unresolved (see OQ-012).

Error Traceability

Error	Functional Requirement	Business Requirement
ERR-001	FR-001	BR-001
ERR-002	FR-002	BR-002
ERR-003	FR-003	BR-003
ERR-004	FR-004	BR-004
ERR-005	FR-005	BR-005
ERR-006	FR-007	BR-007
ERR-007	FR-008	BR-008
ERR-008	FR-009	BR-009
ERR-009	FR-012	BR-012
ERR-010	FR-013	BR-013
ERR-011	FR-015	BR-015
ERR-012	FR-016	BR-016
ERR-013	FR-017	BR-017
ERR-014	FR-019	BR-019
ERR-015	FR-020	BR-020
ERR-016	FR-006	BR-006

Consistency Notes

- The BRD business-rule artifact and the BRD document both use the ID prefix BR- for business rules (BR-001..BR-008), which is distinct from but identical-in-prefix to the business-requirement IDs (BR-001..BR-023). The convention is preserved verbatim from the approved source; no rewrite was made.
- All open questions OQ-001 through OQ-013 are carried forward from the BRD; none were silently resolved.
- ERR-016 intentionally traces to FR-006 (source BR-006, customer logout), which is noted because it also covers FR-018 (bank-operations logout). This is an explicit consistency note, not an invented requirement.
- No missing FR references were detected in the approved source material.
