
Error Catalogue

Project Name: Online Banking Application

Version No.: 1.0

Status: RAW

Approval Status: NOT_APPROVED

READY_FOR_HUMAN_REVIEW

1. Introduction

This catalogue records known inconsistencies and gaps traced to the approved functional requirements. It does not invent error codes or messages; undefined error behaviour is preserved and referenced to Open Question OQ-012.

2. Errors and inconsistencies

ERR-001 - Error codes and messages not specified

Field	Value
Description	The approved source does not specify error codes or error messages for the online-banking simulation.
Type	INCONSISTENCY_OR_GAP
Severity	INFO
Source business requirement(s)	BR-001, BR-002, BR-003, BR-004, BR-005, BR-007, BR-008, BR-009, BR-010, BR-011, BR-012, BR-013, BR-014, BR-015, BR-016, BR-017, BR-019
Traceability (FR)	FR-001, FR-002, FR-003, FR-004, FR-005, FR-007, FR-008, FR-009, FR-010, FR-011, FR-012, FR-013, FR-014, FR-015, FR-016, FR-017, FR-019
Referenced open question	OQ-012
Resolution	Error codes and messages must be resolved via Open Question OQ-012 before approved error behaviour can be specified. No error codes or messages are invented.

ERR-002 - Approved BRD requirements referenced; brd/approved missing

Field	Value
Description	The FRD generation consumed brd/raw artifacts because no brd/approved directory exists in the repository. The issue requested brd/approved as authoritative input.
Type	UPSTREAM_ARTIFACT_STATE
Severity	HIGH
Source business requirement(s)	None (upstream artifact state)
Traceability (FR)	None (upstream artifact state)
Referenced open question	None
Resolution	Per FRD Agent failure-condition instructions, generation proceeded from brd/raw when brd/approved is not present. The BRD must be human-approved and baselined to brd/approved before downstream reuse as an approved baseline.
